Key Answer

I- Text Book

1- A Geometric perspective is an approximate representation, on a flat surface (such as paper), of an image as it is seen by the eye.

2- Interior design is the art and science of enhancing the interiors, sometimes including the exterior, of a space or building, to achieve a healthier and more aesthetically pleasing environment for the end user.

3- Interior design has been a consequence of the development of society because of the development of industrial processes.

4- In ancient Egypt, "soul houses" or models of houses were placed in tombs as receptacles for food offerings. From these, it is possible to discern details about the interior design of different residences throughout the different Egyptian dynasties, such as changes in ventilation, porticoes, columns, loggias, windows, and doors.
